Portfolio

SKILLS

Core Development

- JavaScript
- React
- Node.js
- SQL
- Git & GitHub
- REST APIs

Backend Dev Practices

- API integration
- Database design basics
- Authentication flows
- Component architecture

Tools

- Docker
- GitHub Copilot
- VS Code
- AI-assisted development (ChatGPT, Copilot)
- Agile development practices and team collaboration workflows

UX/UI Design

- Figma
- Wireframing

LANGUAGES

- English – Advanced
- Finnish – B1–B2 (Intermediate)
- Persian – Native

SUMMARY

Junior Full Stack Developer and Software Development student with solid experience in React, JavaScript, and responsive frontend development, along with growing backend skills in Node.js, SQL, and REST APIs. Experienced in building maintainable web applications with reusable components and API-driven architecture.

Comfortable working in structured, team-based development environments with Agile workflows and version control practices. Motivated by scalable software systems, cloud technologies, and continuous learning in modern engineering practices, including AI-assisted development.

PROJECTS

Personal Portfolio (React) **2025–present**
Built and deployed a responsive portfolio web application using **React and JavaScript**, focusing on component-based architecture, REST API integration, and scalable frontend structure.

Designed maintainable UI flows with routing, state management, and responsive layouts. Improved performance, accessibility, and code reusability through iterative refactoring and structured development practices using modern AI-assisted tools.

EDUCATION

Software Development – Business College Helsinki **2025–present**
◇ Coursework includes React, JavaScript, TypeScript fundamentals, SQL databases, PHP, WordPress, and full stack web development projects.

◇ Built school assignments involving database queries, CRUD logic, and frontend-backend integration.

Research on Renewable Energy – University Kebangsaan Malaysia **2014–2015**

Bachelor of Electronic Engineering – University of Garmsar, Iran **2005–2009**

EXPERIENCE

Senior Quality Control – HappyFresh (Malaysia) **2016.03–2019.09**
Worked with structured product data in a large-scale digital e-commerce platform, ensuring data quality, consistency, and validation across operational workflows. Gained experience working in structured systems with high-volume data processing and process-driven environments.

Content Executive – Shopee (Malaysia) **2015.06–2016.03**
Managed structured product and content data using internal CMS platforms in a fast-paced digital marketplace environment. Supported system accuracy by maintaining consistent metadata, pricing, and product information across multiple workflows.

Research Assistant – University Kebangsaan Malaysia **2014.01–2015.10**
◇ Conducted academic research and structured literature reviews, supporting data analysis and research documentation in university projects.

Commercial Expert – Iman Electronics (Iran) **2009.04–2013.09**
◇ Maintained market and competitor awareness through regular research into activities, trends, and industry developments.
