has completed the course

Protection from threats

DescriptionThe Cyber security basics course is divided into six chapters and covers all the basics needed to ensure that your time online – as well as when using the Office 365 applications – is safe and secure. Throughout the course, you will learn how to properly handle file sharing, send emails securely, set up Teams meetings in a safe way, avoid scam and phishing attacks and protect yourself from all kinds of possible threats online. The cou...
