

BITA YEGANEH

Junior Web Developer | Full-Stack Foundations & QA Background

Espoo, Finland | b.yeganeh85@gmail.com | +358 40 255 0957 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

ICT student and junior web developer with an engineering background and prior quality-control experience. Built and deployed web applications using React, Astro, TypeScript, Node.js, Python and Django, including a live company website redesign (Lighthouse mobile score 84/100) and an HR management system with a React front end and a REST API (JSON Server). Combines hands-on development work with a QA mindset from three years managing data accuracy at scale. Seeking a junior frontend, full-stack or software-testing role.

SKILLS

Frontend: React, JavaScript, TypeScript, Next.js, Astro, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Python, FastAPI, Django, PHP, SQL

Tools & Practices: Git, GitHub, Docker, WordPress, Figma, AI-assisted coding (GitHub Copilot, Claude, Microsoft Copilot)

QA & Design: QA/testing background, responsive design, UI/UX, accessibility basics

EXPERIENCE

ICT Trainee – Full-Stack Developer

06/2026 – 09/2026

Cyber Security Finland Oy, Helsinki (Hybrid)

- Delivered a complete redesign of the company website using React, Astro and TypeScript.
- Improved site performance and mobile usability, reaching a Lighthouse mobile score of 84/100.
- Took part in requirements gathering with stakeholders and implemented features based on those requirements.
- Used Git/GitHub for version control, participated in code reviews and deployment (Vercel).

Senior Quality Control Executive

03/2016 – 08/2019

HappyFresh, Malaysia

- Owned QA processes for e-commerce application on a high-traffic platform, achieving near-100% data accuracy.
- Identified and documented content and data issues in collaboration with product and operations teams.
- Developed standardized QC procedures that improved data consistency across regions.
- Promoted to Senior QC Executive within two years.

Content Executive

06/2015 – 03/2016

Shopee, Malaysia

- Reviewed and validated digital content across the platform for accuracy and compliance.
- Detected data anomalies and improved consistency across regional content sets.
- Collaborated with cross-functional international teams.

Research Assistant

06/2014 – 09/2015

Universiti Kebangsaan Malaysia (UKM), Malaysia

- Contributed to a research project on thermoelectric energy generation.
- Co-authored 3 research articles published in international journals.
- Recipient of an FRGS research grant from the Malaysian Ministry of Education.

PROJECTS

Company Website Redesign — Cyber Security Finland

2026

Rebuilt the company marketing site with React, Astro and TypeScript, focused on accessible, responsive UI. Achieved a Lighthouse mobile performance score of 84/100.

HR Management System

2025

Built an HR management application: React front end consuming a REST API (JSON Server). Implemented employee records CRUD, automated probation-review and work-anniversary reminders, and deployed both front end and API to live hosting. Added 39 automated tests (Vitest, React Testing Library, Playwright) running in GitHub Actions CI; testing found and fixed 6 bugs.
