Univ. of Garmsar, 2005–2009

CERTIFICATIONS

- QA Jam – Software Testing & QA
Tietoala ry, 2026
- Cyber Security Basics
Eduhouse Oy, 2026

SUMMARY

Fullstack Developer with professional experience in **React, Node.js, TypeScript, and SQL**, and a background in quality assurance that ensures high standards. Currently working as an ICT Trainee at Cyber Security Finland, where I led the complete redesign of a live company website—improving performance, accessibility, and user experience.

Previously, I built a career in quality control at leading e-commerce platforms in Southeast Asia: **Shopee** (a major online marketplace) and **HappyFresh** (a grocery delivery service). At HappyFresh, I achieved 100% data accuracy and was promoted to Senior QC Executive within two years. This experience gives me a unique ability to build reliable, data-driven applications with a sharp eye for detail.

I bring strong problem-solving skills, cross-cultural adaptability, and a passion for building products that users can trust. Actively seeking a junior fullstack role where I can contribute to a collaborative team and grow as a software engineer.

EXPERIENCE

ICT Trainee (Hybrid) Jun 2026–Present

Cyber Security Finland

- Led the full redesign using Astro, JavaScript, HTML, CSS, improving performance and mobile responsiveness.
- Architected an interactive carousel and added a compliance trust bar to support core company messaging.
- Collaborated to implement web security best practices and improve WCAG accessibility.
- Gained practical experience in version control (Git), deployment, and modern frontend patterns.

Senior Quality Control Executive 2016–2019

HappyFresh | Malaysia

- Managed QA processes for e-commerce content, achieving 100% data accuracy.
- Promoted from QC to Senior QC Executive within 2 years.

Content Executive Jun 2015–Mar 2016

Shopee | Malaysia

- Reviewed and validated digital content, improving platform-wide accuracy.

Research Assistant Jun 2014–Sep 2015

National University of Malaysia (UKM)

- Master’s-level research on thermoelectric generation; awarded FRGS grant, published 3 papers.

Commercial Expert Apr 2009–Aug 2013

Iman Electronic | Iran

- Managed supplier negotiations and technical documentation for international electronics trade.

PROJECTS

Cyber Security Finland – Website Redesign 2026–Present

- Live company redesign with modern identity, interactive components, and compliance section.

HR Management System (React, Node.js, SQL) 2025

- Full-stack HR app with a React dashboard and Node.js/Express REST API.

Personal Portfolio Website 2025–Present

- Modern portfolio built with React and deployed to a live environment.

ABC OF MEDIA Website 2025

- WordPress/PHP site with custom page templates and content structure.

Pancake Order System & Cafe UI Design 2025

- Vanilla JS ordering system with dynamic pricing; Figma prototype for cafe website.

Tech News Website 2025

- WordPress/PHP based news site with custom content layouts.
